DETAILED ACTION

This Office action is in response to the communication filed 9-20-04.

Claims 1, 5, 10, 59-68 are pending in the instant application.

Response to Arguments and Amendments

Withdrawn Rejections

Any rejections not repeated in this Office action are hereby withdrawn.

New Rejections

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 5, 10, 59-68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 it is unclear how the sequences listed, which comprise a minimum of e.g. 3 or 6 nucleobases in length, can also comprise 2 base 3'-OH, 5'-OH structures. The compounds claimed cannot meet the structural limitations set forth in the claim. Appropriate clarification is requested.

The claim recites a 2 to 20 base 3'-OH, 5'-OH nucleotide sequence, which is selected from the SEQ ID Nos. listed in claim 1. The claimed invention is understood to comprise nucleotides consisting of the recited SEQ ID Nos, and flanked by hydroxyl

Art Unit: 1635

groups. It is therefore unclear what the 2 to 20 base 3'-OH, 5'-OH is referring to in claim 1, since none of the sequences claimed have either of these lengths.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 60 are rejected under 35 U.S.C. 102(e) as being anticipated by McClelland.

McClelland (USPN 5,861,245) teaches the nucleic acid sequence consisting of SEQ ID NO: 9 (see accompanying alignment data and SEQ ID NO: 8 of McClelland).

Claims 1 and 63 are rejected under 35 U.S.C. 102(e) as being anticipated by Boevink et al.

Boevink et al (USPN 6,211,431) teach a nucleic acid sequence consisting of SEQ ID NO: 26 (see accompanying alignment data and SEQ ID NO: 34 of Boevink et al).

Art Unit: 1635

Claims 1 and 64 are rejected under 35 U.S.C. 102(b) as being anticipated by Toole et al.

Toole et al (USPN 5,582,981) teach a nucleic acid sequence consisting of SEQ ID NO: 41 (see accompanying alignment data and SEQ ID NO: 9 of Toole et al).

Claims 1 and 68 are rejected under 35 U.S.C. 102(e) as being anticipated by Vitek et al.

Vitek et al (USPN 6,255,473) teach a nucleic acid sequence consisting of SEQ ID NO: 46 (see accompanying alignment data and SEQ ID NO: 15 of Vitek et al).

Allowable Subject Matter

SEQ ID Nos. 8, 10, 25, 42, 43 and 45 appear free of the prior art searched and of record.

Conclusion

Certain papers related to this application may be submitted to Art Unit 1635 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. → 1.6(d)). The official fax telephone number for the Group is **703-872-9306**. NOTE: If Applicant *does* submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO
